Linking one's brain, heart, and voice takes balance – a fine balance of emotion and rationality to succeed --- and it is critical thinking that is the connecting link between emotions and intelligence. Critical thinking feeds and enables emotional intelligence, and there are a number of reasons why you should cultivate your emotional intelligence:
 - Self-Awareness – clearly understand your strengths and weaknesses without any obstruction
 - Emotional Management – not only be aware of your feelings but learn to manage those emotions
 - Social Awareness – be well-tuned to the emotions of others and pick up on what's going on around you
 - Effective Communication / Relationship Management – clearly convey what you want to say and do so in a manner that inspires and motivates others and builds relationships

Trainees receive a QPR booklet and wallet card.
